The ATR level in August was a result of the increase in the ATR of the domestic debt, which amounted to 3.15 years (fell by 0.08 year m/m) and the decrease in the ATR of the foreign debt, which amounted to 5.51 years (by 0.09 year m/m). The levels of the ATR resulted from changes in the ATM and the share of floating rate instruments. The ATR of the domestic debt remained within range of 2.8-3.6 years assumed in the public debt management strategy.

Duration* of ST debt

In August 2021 the duration of the ST debt amounted to 3.71 years (i.e. fell by 0.09 year m/m and rose by 0.16 year as compared to the end of 2020). The level of duration was a result of the fell of the domestic debt duration which amounted to 3.07 years (by 0.11 year m/m) and a decrease of the foreign debt duration which amounted to 5.37 years (by 0.08 year m/m). The changes in the duration resulted mainly from changes in interest rates level and the ATR. The levels of the ATR, as well as the duration, indicated that the interest rate risk of the ST debt remained stable.

ATM and duration* of domestic ST debt by group of investors

At the end of August 2021 the ATM and the duration of the portfolio of the domestic TS held by foreign investors amounted to 4.65 years (-0.06 years m/m) and 4.58 years (-0.09 years m/m) respectively. The ATM and the duration of the domestic non-banking sector TS portfolio amounted to 4.22 years (-0.04 years m/m) and 2.86 years (-0.08 years m/m), respectively. The ATM and the duration of the TS portfolio held by the domestic banking sector amounted to 4.22 years (-0.04 years m/m) and 2.86 years (-0.08 years m/m), respectively.
