AI Factories provide large amounts of **computing power**, secure **data rooms**, and **AI development services**.

Also for companies!

The **JUPITER AI Factory (JAIF)** is currently the only one of the 19 AI Factories with an **exascale supercomputer** for AI training.

The **JUPITER AI Factory (JAIF)** is built around
the JUPITER supercomputer.
And supported by “smaller” systems
(JURECA-DC, JUWELS, 43, 42, ...).

JAIF provides **systematic/structural services**
and **individual services** along the whole AI
product cycle.

Jülich, 7th September 2025: JUPITER Inauguration

JUPITER

Exascale Supercomputing in Europe

> 1 ExaFLOP/s HPL-FP64 performance (< 20 MW)

- 24 000 NVIDIA GH200 superchips
- 2880 TB CPU memory (LPDDR5)
- 2304 TB GPU memory (HBM3)
- NVLink C2C (900 GB/s)
- NVIDIA Mellanox InfiniBand NDR/NDR200
- Dragonfly+ topology

> 1 EB total storage

- Hierarchical storage system: ExaFLASH < ExaSTORE/JUST6 < ExaTAPE/Archive
- ExaFLASH: 29 PB NVMe storage integrated into InfiniBand fabric
- ExaSTORE/JUST6: > 500 PB disk storage
- ExaTAPE/Archive: > 800 PB tape storage

Modular Data Center (MDC)

- 37.5 MW power capacity
- Containerized supercomputer
- Flexible and scalable concept
- Hot water cooling
- Utilization of waste heat
- High reliability
- Fast data connectivity

The JUPITER AI Factory (JAIF)

European Commission Executive Vice-President Henna Virkkunen during her visit to Jülich, 23rd April 2025.

“My congratulations to the Jülich Supercomputing Centre as it prepares to host an AI Factory, to be powered by Europe's first exascale supercomputer, one of the most powerful and energy efficient supercomputers in the world. This cutting-edge facility, to be inaugurated in just a few months, is more than just a milestone; together with other AI Factories it is the cornerstone of our AI continent strategy to foster German and European AI innovation and create a step-change in EU competitiveness. As I embark on my tour of Europe's emerging AI factories, starting right here in Jülich, I am inspired by its creativity and transformative potential. The future of Europe as AI Continent is being forged right here, right now.”

(Henna Virkkunen)

JUPITER is the begin of the
Exascale era in Europe.

JAIF develops JUPITER into an
Advanced AI Platform!

The combination of excellence in *HPC and AI expertise, Exascale computing, and services around AI* makes JAIF unique and the driver of
the **European AI Continent!**
