

Pilna notatka bezpieczeństwa

Korekta produktu

Wymagane podjęcie natychmiastowych działań

Data wydania 13 listopada 2025 r.

Produkt

Nazwa produktu	Nr kat.	Nr seryjny	Niepowtarzalny kod identyfikacyjny wyrobu (UDI)
Alinity ci-series System Control Module (SCM, moduł sterujący systemem)	03R70-01	Patrz Załącznik A	

Dotyczy

Szanowni Państwo!

Firma Abbott zidentyfikowała cztery (4) potencjalne błędy w działaniu oprogramowania systemu Alinity ci-series w wersjach 3.6.1 oraz niższych. Firma Abbott udostępnia właśnie nową wersję oprogramowania systemu Alinity ci-series, wersję 3.7.0 (nr kat. 04V20-29), aby naprawić te potencjalne błędy. (Szczegółowe informacje, patrz **Załącznik A**). Oczekiwany termin udostępnienia globalnie wersji 3.7.0 oprogramowania systemu Alinity ci-series do instalacji to listopad 2025 r.

Przedstawiciel serwisu firmy Abbott skontaktuje się z Państwem, aby uzgodnić termin przeprowadzenia obowiązkowej aktualizacji oprogramowania systemu Alinity ci-series do wersji 3.7.0.

Wpływ na wyniki badań dawcy/pacjenta

Szczegółowe informacje na temat ewentualnego wpływu błędów wykrytych w oprogramowaniu systemu Alinity ci-series w wersjach 3.6.1 i niższych na wyniki pacjentów, patrz **Załącznik A**.

Wymagane działania do podjęcia przez Klienta

Należy stosować się do wymaganych działań opisanych w **Załączniku A** do czasu zainstalowania oprogramowania w wersji 3.7.0.

Należy wypełnić i odesłać formularz Potwierdzenia Klienta.

W przypadku przekazania ww. produktu innym laboratoriom prosimy o poinformowanie tych placówek o korekcie produktu oraz dostarczenie im kopii niniejszego pisma.

Niniejsze pismo należy dołączyć do dokumentacji laboratorium.

Kontakt

W przypadku jakichkolwiek pytań ze strony Państwa laboratorium lub obsługiwanych przez Państwa placówek służby zdrowia dotyczących podanych informacji prosimy kontaktować się z przedstawicielem regionalnym firmy Abbott odpowiedzialnym za Państwa laboratorium.

W razie uszczerbku na zdrowiu pacjenta lub użytkownika spowodowanego sytuacją opisaną w niniejszym piśmie należy niezwłocznie zgłosić to zdarzenie przedstawicielowi regionalnemu.

Załącznik A – Wymagane działania

Opisane potencjalne błędy dotyczą wyłącznie modułu roboczego Alinity i.			
Nr	Opis problemu	Wpływ na wyniki badań dawcy/pacjenta	Działania wymagane do czasu zainstalowania oprogramowania w wersji 3.7.0
1	Niewystarczający cykl mycia może spowodować nagromadzenie się soli w zespole grzałki indukcyjnej, co może pogorszyć jakość mycia pipetora próbkowego, zwiększając ryzyko efektu przeniesienia pomiędzy próbkami.	Istnieje możliwość uzyskania nieprawidłowych wyników na skutek ewentualnego efektu przeniesienia pomiędzy próbkami. Na dzień wydania niniejszego pisma nie odnotowano żadnych przypadków wpływu opisanego problemu na prowadzenie pacjenta.	Należy przeprowadzić <i>Cotygodniową procedurę konserwacyjną (i-series) 2630 Ręczne czyszczenie studzienki myjącej (i-series)</i> , zgodnie z rozdziałem 9 Instrukcji obsługi Alinity ci-series.
2	Może dojść do niewielkich zmian w wartościach RLU (względne jednostki światła), jeśli odczyt dla próbki zbiega się w czasie ze wstawieniem kolejnego naczynka reakcyjnego. Dzieje się tak dlatego, iż wstawienie naczynka reakcyjnego powoduje przesunięcie tarczy ścieżki reakcyjnej, zmieniając ustawienie naczynka reakcyjnego przy czytniku optycznym i wpływając na pomiar wartości RLU.	Istnieje możliwość uzyskania nieprawidłowych wyników na skutek przesunięcia wartości RLU. Na dzień wydania niniejszego pisma nie odnotowano żadnych przypadków wpływu opisanego problemu na prowadzenie pacjenta.	Przedstawiciel serwisu firmy Abbott skontaktuje się z Państwem, aby ustalić termin instalacji oprogramowania w wersji 3.7.0.
3	Po załadowaniu nowego pojemnika odczynnikowego jest on poddawany mieszaniu przed rozpoczęciem dozowania. Dozowanie powinno się rozpocząć po 300 sekundach, ale może się rozpocząć po 200 sekundach, potencjalnie obniżając jednorodność odczynnika i wpływając na interakcję między próbką i odczynnikiem.	Ze względu na skrócony czas mieszania istnieje możliwość uzyskania nieprawidłowych wyników, jeśli interakcja pomiędzy próbką i odczynnikiem będzie zakłócona. Na dzień wydania niniejszego pisma nie odnotowano żadnych przypadków wpływu opisanego problemu na prowadzenie pacjenta.	Przedstawiciel serwisu firmy Abbott skontaktuje się z Państwem, aby ustalić termin instalacji oprogramowania w wersji 3.7.0.

Załącznik A – Wymagane działania (ciąg dalszy)

Opisany potencjalny błąd dotyczy wyłącznie modułu roboczego Alinity c.			
Nr	Opis problemu	Wpływ na wyniki badań dawcy/pacjenta	Działania wymagane do czasu zainstalowania oprogramowania w wersji 3.7.0
4	Ruch sondy pipetora odczynnikowego R1 lub R2 w module roboczym Alinity c może być ograniczony, co nie zostanie zgłoszone w postaci komunikatu o błędzie 5744 <i>Ruch pipetora R1 ograniczony w (0) pozycja (1) oraz 5745</i> <i>Ruch pipetora R2 ograniczony w (0) pozycja (1).</i> W takim przypadku sonda pipetora R1 lub R2 może ulec wygięciu, system będzie kontynuował pracę, a operator będzie nieświadomy wystąpienia tego problemu.	Istnieje możliwość uzyskania nieprawidłowych wyników, gdy niewystarczająca ilość odczynnika zostanie odmierzona do próbki na skutek wygięcia pipetora. Na dzień wydania niniejszego pisma nie odnotowano żadnych przypadków wpływu opisanego problemu na prowadzenie pacjenta.	Zaleca się codzienne przeprowadzanie <i>Procedur diagnostycznych pipetorów (c-series) 4109 Test ustawienia sondy (c-series)</i> dla sond pipetorów R1 oraz R2, zgodnie z rozdziałem 9 Instrukcji obsługi Alinity ci-series do czasu zainstalowania wersji 3.7.0 oprogramowania. Jeśli zaobserwują Państwo, że sonda pipetora (R1, R2) uległa wygięciu, należy przeprowadzić procedurę wymiany elementu <i>Wymień sondy odczynnikowe (c-series)</i>, zgodnie z rozdziałem 9 Instrukcji obsługi Alinity ci-series.
