

HACKUITY:

BRINGING *CLARITY* TO CYBER VULNERABILITY CHAOS

Call Topic:
HORIZON-CL3-2025-02-ECCC-01

Generative AI for Cybersecurity applications

YOUSSEF LAAROUCHI, PhD, Prof.
HEAD OF INNOVATION, HACKUITY

2-ways to break into an organization:

<Social Engineering>

<Exploitation of IT Vulnerabilities>

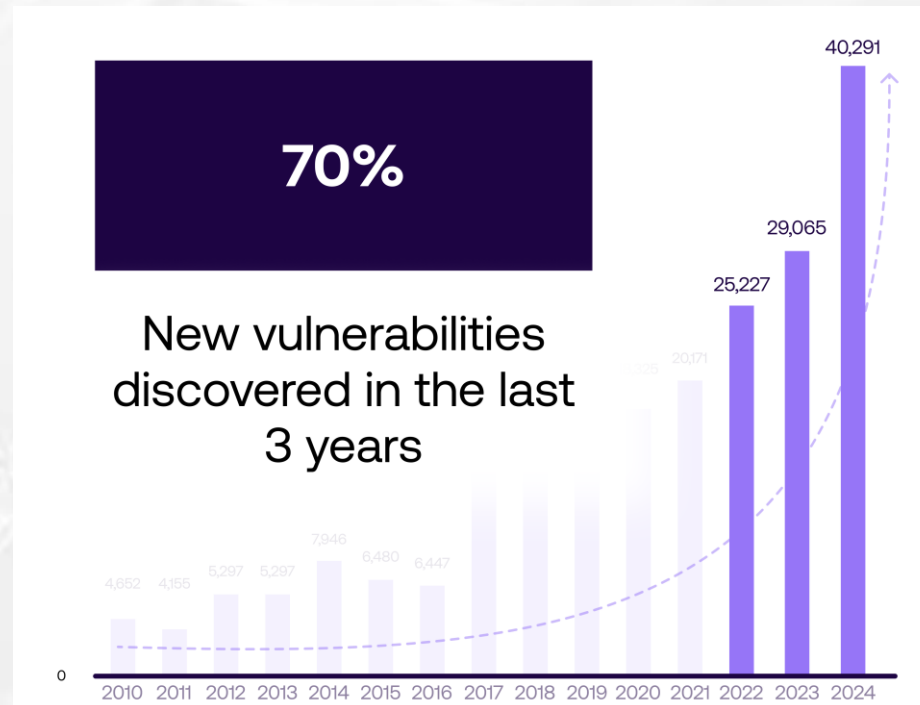

Vulnerabilities remain the #1 open door for hackers.

“60% of cyber compromises are attributable to unfixed vulnerabilities” Information Security Media Group, August 2024

90%+ of those breaches were easily preventable

Why are teams failing at remediation?

The vulnerability tsunami

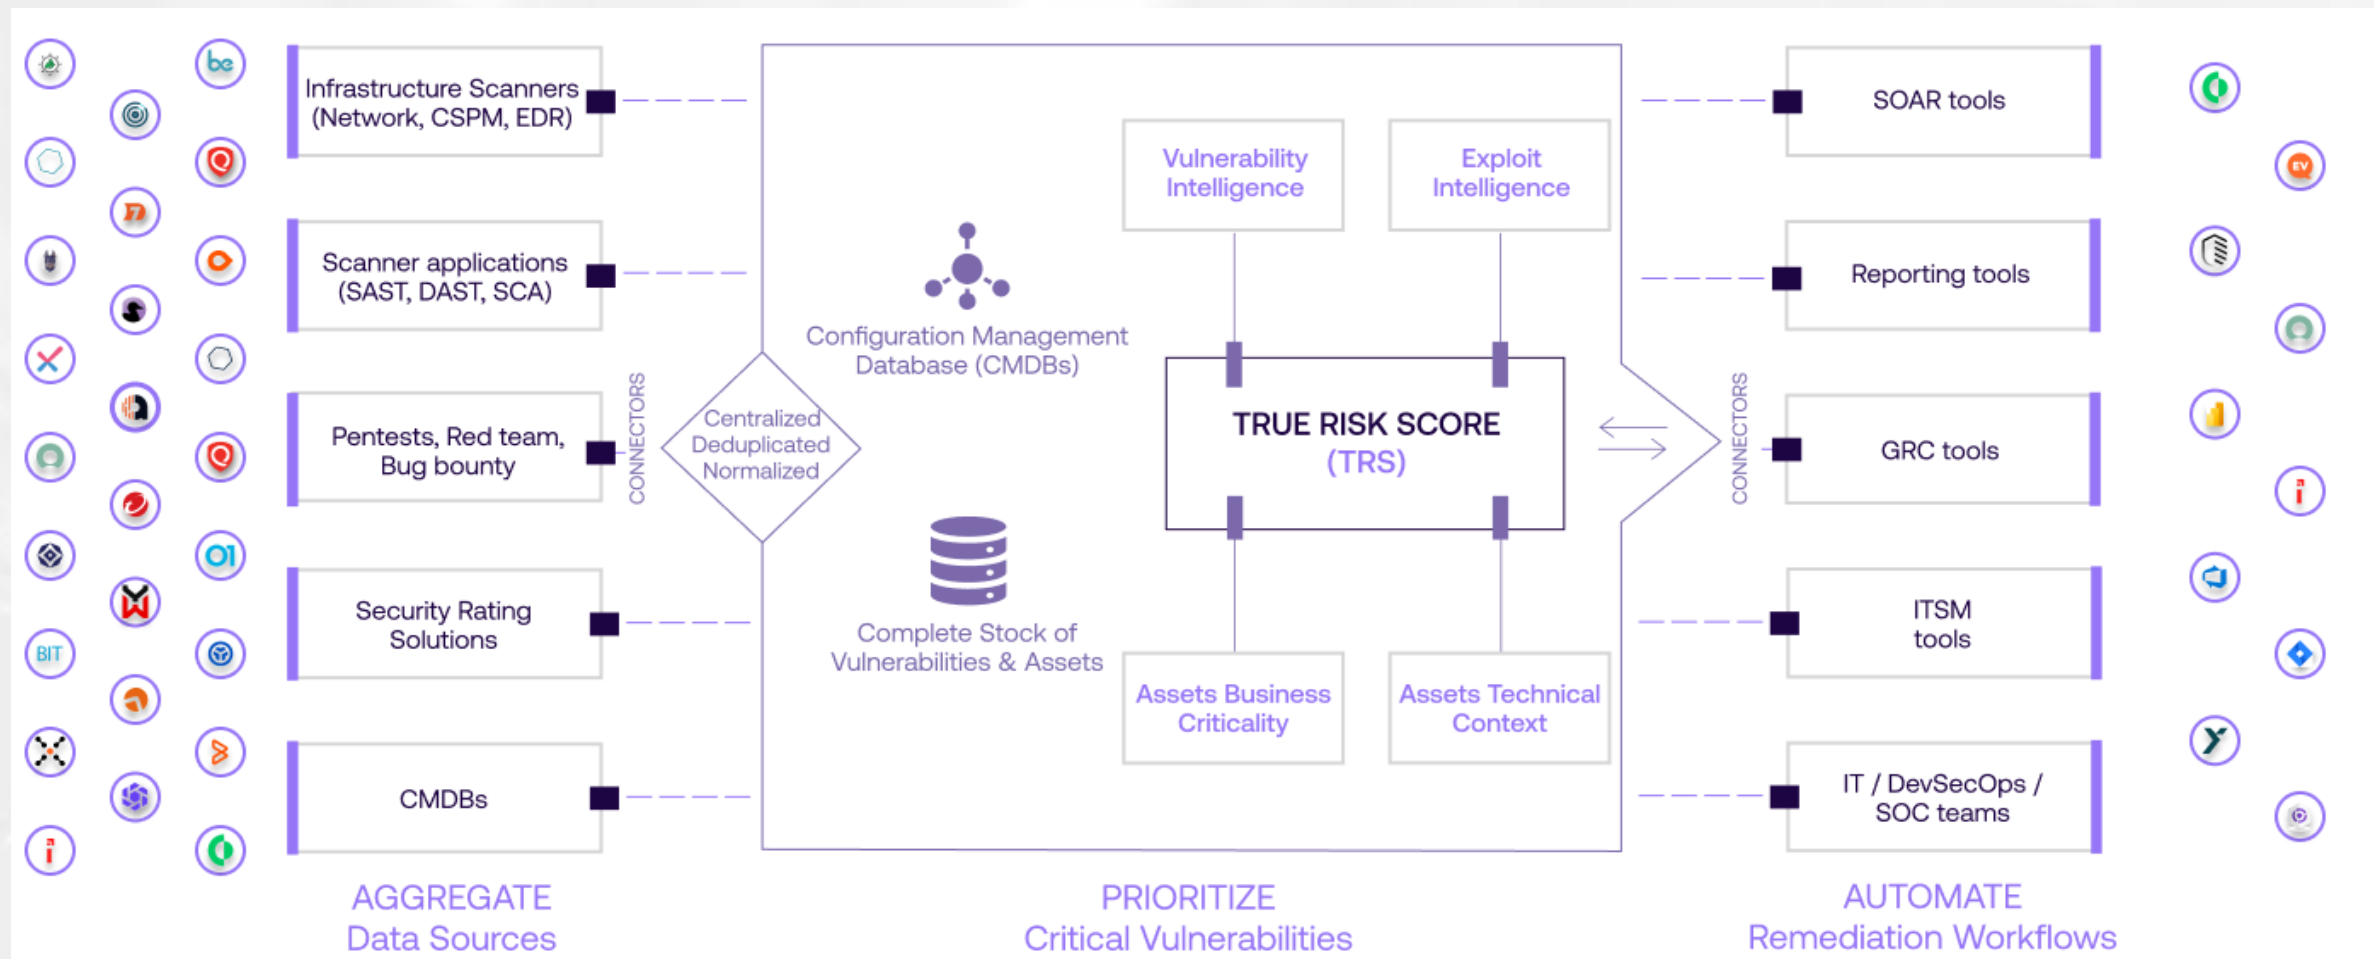

190M+ findings handled daily by our top customer.

33 tools used on avg. by large companies to manage vulnerabilities.

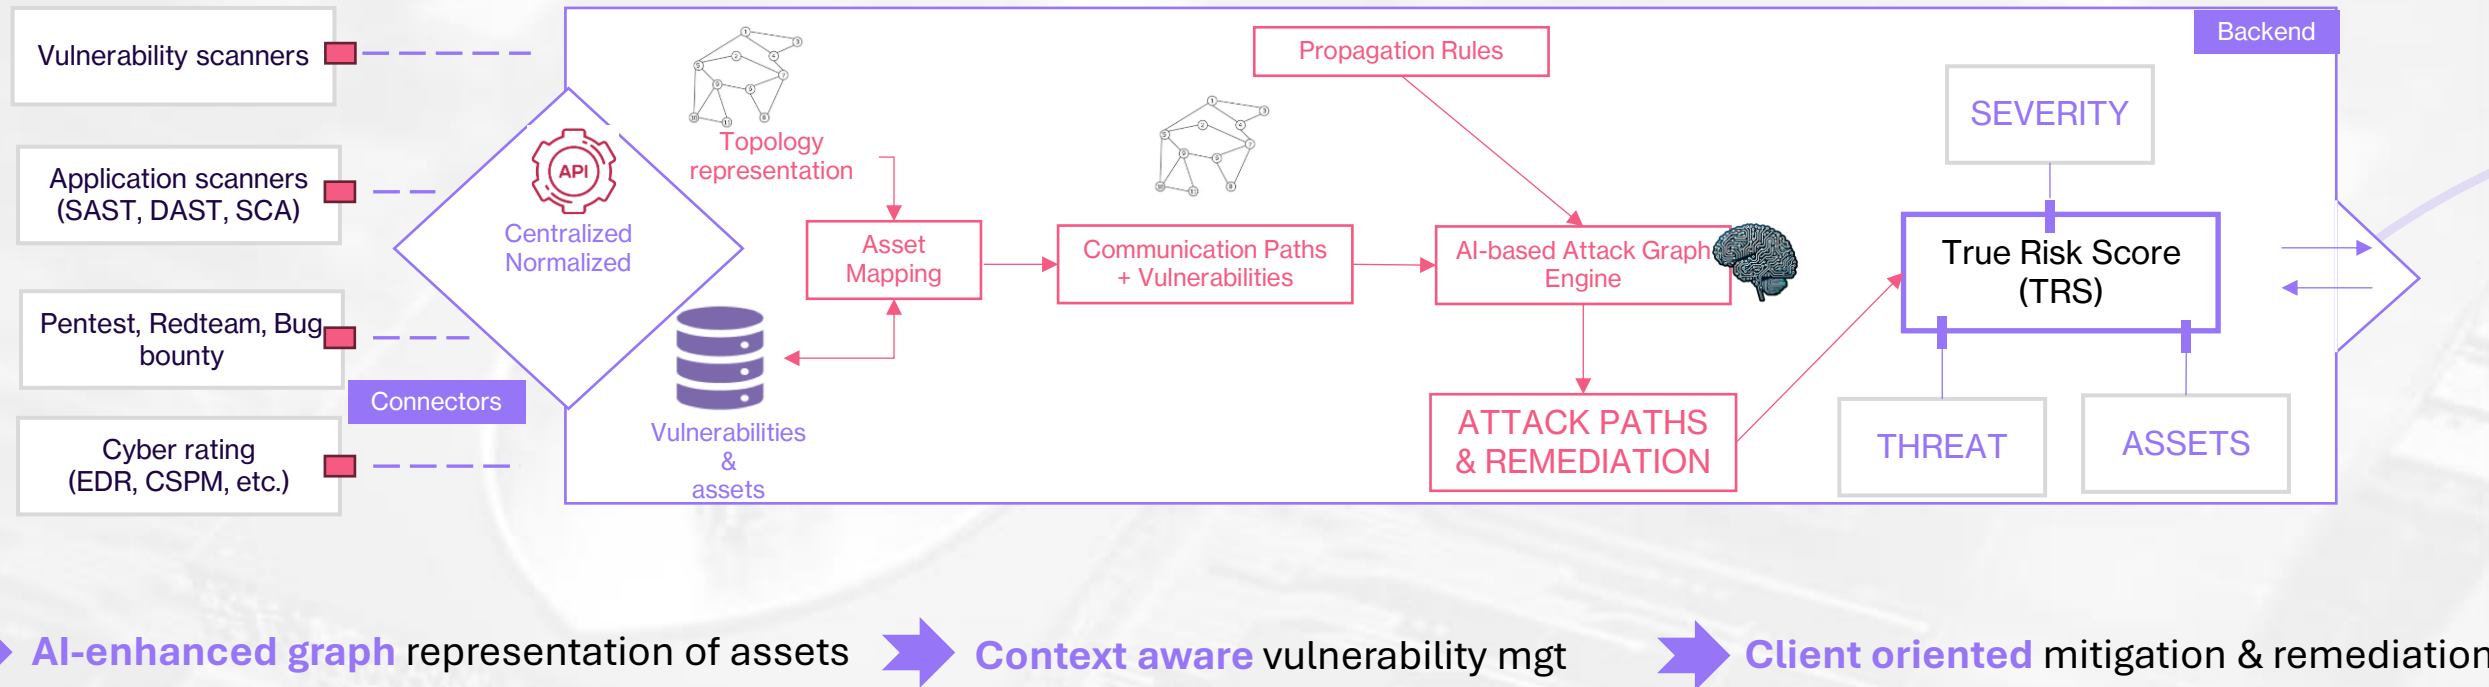

Drowning in tools | Tons of findings | Noise | Conflicting priorities

Hackuity. How it works.

CLOUD | ON-PREM

Proposal

Expectations:

- # Integrate existing consortium as Vuln. Mgt. Provider
- # Find End User / AI Experts / Scanners Providers

/ hackuity

Thank you
