

CSA GenAI for Public Administrations (DIGITAL-2026-AI-09)

Agencia Digital de Andalucía

Dec 2025

Building on EUNOMIA.AI: A Coordinated Effort to Scale GenAI for Public Administrations

- EUNOMIA.AI is the consortium submitted under the GenAI4PAs RIA call, currently under evaluation (+10 member states / +20 Public Administrations)
- It includes a strong network of public administrations and institutions from across Europe (GRNET, Latvia, The Hague...)
- The CSA proposal is a complementary initiative, aiming to support and scale up these pilot efforts and open the ecosystem to new players.
- New stakeholders like Fundación AI Granada R&I (with its recently granted EDIH AirAndalusia for applied AI) are joining forces to boost replicability, community building and capacity development.

Expanding the Reach: From Pilots to Broad Adoption

The CSA will serve as the scaffolding to help public administrations adopt GenAI more effectively.

The Consortium, ADA and Fundación AI Granada aim to:

1. Leverage the lessons from the pilots (EUNOMIA.AI and others)
2. Offer tools, support, and training for new adopters
3. Provide links to AI-on-Demand, EDIHs, and the wider EU AI ecosystem

Focus on practical implementation paths: training, legal and organisational guidance, and peer learning.

What We Bring to the Table

-  **Starter kits**: replicable packages for setting up GenAI use cases
-  **Replicability assessments**: technical, organisational, legal
-  **Community of Practice**: for cross-border learning and collaboration
-  **Helpdesk**: technical and legal support to new adopters
-  **Benchmarks & demand pooling**: to connect needs with EU startups
-  **Matchmaking**: between administrations and trusted EU-based GenAI providers

A Cross-European Partnership with Local Impact

 **Led by:** Agencia Digital de Andalucía and Fundación AI Granada (EDIH AirAndalusia)

 **Collaborating with:**

- LV VARAM / Latvia (already in EUNOMIA.AI)
- GR GRNET / Greece (already in EUNOMIA.AI)
- NL The Hague (already in EUNOMIA.AI)
- Other potential new actors from academia, govtech, NGOs...

Open to new contributors for:

- Community building
- Legal/ethical frameworks
- Technical onboarding
- Dissemination and visibility

Be Part of the GenAI4PublicServices Community

The CSA call is now open, and we are shaping a collaborative, open and impactful proposal.

We welcome partners interested in:

- Scaling and supporting GenAI pilots
- Legal, ethical and organisational support
- Community-building and cross-border transfer

Let's build a strong CSA proposal together — we're looking forward to meeting you and continuing the conversation.
