Hungary – publication of official <u>migration statistics (2011)</u> presenting a wide range of information on the migratory situation. [April 2012]

United Kingdom – Migration Statistics Quarterly Report May 2012 with provisional figures to September 2011 showing that annual net migration to the UK was 252 000, similar to 255 000 to September 2010. 3. LATEST EMN OUTPUTS AND DEVELOPMENTS

A) MISUSE OF THE RIGHT TO FAMILY REUNIFICATION: MARRIAGES OF CONVENIENCE AND FALSE DECLARATIONS OF PARENTHOOD

Initial findings from this study were presented at the public hearing on the <u>Family Reunification Green Paper</u>. The purpose of this focussed study was to identify the scale and scope of Marriages of Convenience and False Declarations of Parenthood, including (Member) State practices plus available statistics. On the basis of a template, 23 Member States plus Norway each produced a National Contribution from which a Synthesis Report will soon be published.

B) EMN CONTRIBUTION TO THE COMMISSION'S 3RD ANNUAL REPORT ON IMMIGRATION AND ASYLUM (2011)

Accompanying the Commission Communication (COM(2012) 250) was a complementary factual report (SWD(2012) 139) outlining the main developments in migration and international protection during 2011 at both EU and national level. Information on developments at national level was based primarily on the information provided by the European Migration Network as part of its Annual Policy Report activity. Topics covered included Legal Migration and Mobility; Reducing Irregular Migration and Trafficking in Human Beings; Promoting International Protection; and Maximising the Development Impact of Migration and Mobility; Provision and Exchange of Information to support Policy Development plus a detailed Statistical Annex.

C) INDICATIONS OF THE EFFECT OF THE ECONOMIC CRISIS FROM EU MIGRATION STATISTICS IN 2009

As part of the analysis of 2009 migration statistics, the EMN looked for any evidence of the impact of the economic crisis. The effects are evidenced best in relation to <u>legal migration</u>, with nine out of twelve Member States that experienced a decrease in the number of immigrants in 2009, explicitly cited the economic crisis and the Member State's specific economic situation, as an important reason for the decrease in immigration. The perception of reduced opportunities relating to the crisis may have influenced individual decisions in relation to <u>irregular migrants</u> coming to the EU for the purpose of employment, which may have contributed to the decrease in the number of persons refused at the borders, by -21%. There is also some evidence that the economic crisis may have influenced increases in the numbers of apprehensions and returns.

D) OTHER DEVELOPMENTS

- ★ EMN's Asylum and Migration Glossary (Version 2) based on EU acquis and consisting of 300+ terms with translations. The complete Glossary will also be available in German, French, Italian, Portuguese and Spanish later in the year.
