

The new call for application to Poland My First Choice programme

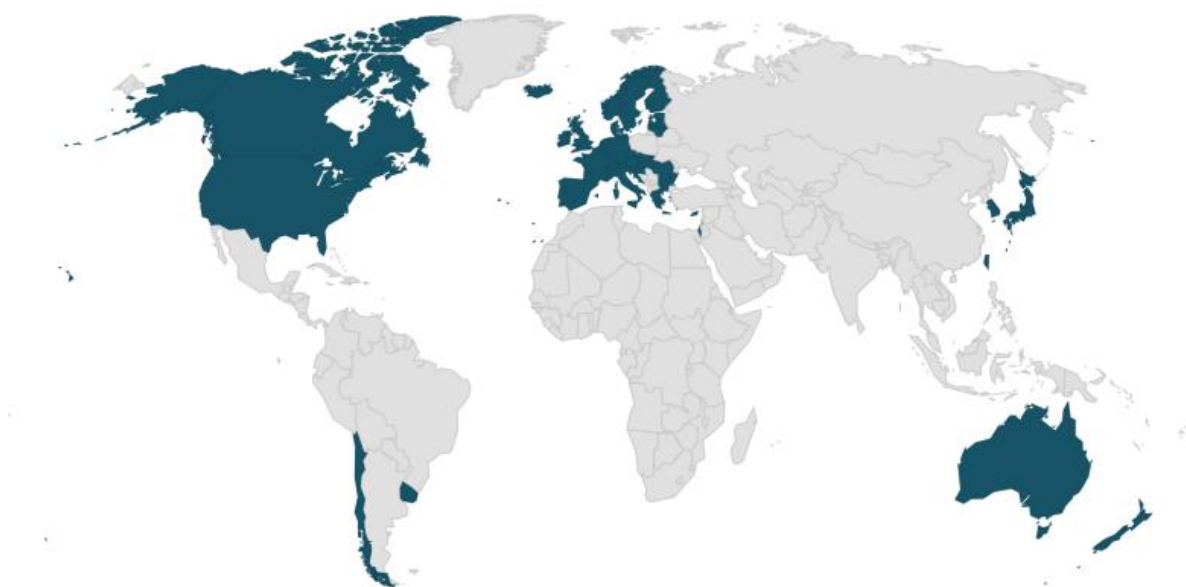

The Poland My First Choice programme offers young people from developed countries the chance to undertake full-time second-cycle studies at Polish universities during the 2025/26 academic year, supported by a monthly scholarship.

As part of the programme, scholarship recipients can pursue their chosen field of study in Polish or English at a university supervised by the Minister of Science and Higher Education that has a framework agreement with NAWA. Those enrolling at public universities are also exempt from tuition fees.

Previous editions of Poland My First Choice in numbers

In previous editions of the programme, 95 students from 25 countries were awarded the scholarship, with the largest numbers coming from France, Italy, the United States, Spain, South Korea, and Lithuania.

The scholarship recipients studied at 22 universities, with most opting for Jagiellonian University, the University of Warsaw, the Technical University of Łódź, and Wrocław University. The most popular fields of study included international relations, management, economics and finance, as well as engineering disciplines such as environmental engineering and computer science fields like data science.
