Information on seaman's book number

The Republic of Poland would like to point out that the seaman's book and personalization sticker are documents which are registered and have a separate number. Therefore, the number of the seaman's book and the number of the personalization sticker have not to be the same and usually are not. Both the seaman's book and the personalization sticker are marked with seven figures and two-letter series AA.

The number of the seaman's book is embossed on its cover, title page and odd-numbered pages of the seaman's book.

Moreover, the personalization sticker, marked with its own number, is stuck to page number two of the seaman's book. At the bottom of the personalization sticker there is a machine-readable field which contains both numbers, i.e. the number of the seaman's book and the number of the personalization sticker.
