

## TEMPORARY ISOLATION TIERS - INTENSIVE CARE UNITS (ICU)

- ▶ **Safe treatment conditions** for isolated patients with high-risk infectious diseases, including COVID19.
- ▶ Fast **hospital-like conditions in any emergency location** or disaster-adapted space, eg. sports center, conference hall.

- ▶ **Immediate** patient treatment setup. Available **for any location**.
- ▶ The **temporary patient room** can be 1-side open, with hygienic curtain, but it can also be closed with a modular ceiling and doors (on an expanded sub-construction), becoming a hospital-like Intensive Care Unit.

▶ Available immediately.

Pre-fabricated elements delivered on-site enable rapid set-up.

▶ TIER 1

- 1-side open temporary ICU installed on a self-standing subconstruction
- Available immediately, pre-fabricated elements delivered on-site enable rapid set-up
- Unified technical and medical supplies panel is integrated in each unit
- Enough space to manoeuvre with mobile medical equipment
- Optimal access to the patient from all sides

▶ TIER 2

- Patient capsule 4x4m with hygienic wall and door modules. Optionally available with ceiling
- A future-proof solution that grows with the needs: temporary modules can later be transformed into complete, fully functional ICU or isolation units with ceiling, technical and medical supplies (underpressure, medical gas stations etc.)
- Unified technical and medical supplies panel is integrated in each unit
- Ergonomic space. Optimal access to the patient
