Provision of Explosive Detection Dogs (EDD) Services for UN premises at the Four Seasons Hotel, Damascus, Syria

NOTICE:

Borrower/Bid No: RFP-038-19

See documents attached below for further details

The United Nations Development Programme (UNDP) hereby invites you to submit a Proposal to this Request for Proposal (RFP) for the above-referenced subject.

This RFP includes the following documents and the General Terms and Conditions of Contract which is inserted in the Bid Data Sheet (BDS):

Section 1: This Letter of Invitation

Section 2: Instruction to Bidders

Section 3: Bid Data Sheet (BDS)

Section 4: Evaluation Criteria

Section 5: Terms of Reference

Section 6: Returnable Bidding Forms

- * Form A: Technical Proposal Submission Form
- * Form B: Bidder Information Form
- * Form C: Joint Venture/Consortium/Association Information Form
- * Form D: Qualification Form
- * Form E: Format of Technical Proposal
- * Form F: Financial Proposal Submission Form
- * Form G: Financial Proposal Form
- * Form H: Form of Proposal Security

If you are interested in submitting a Proposal in response to this RFP, please prepare your Proposal in accordance with the requirements and procedure as set out in this RFP and submit it by the Deadline for Submission of Proposals set out in Bid Data Sheet.

Please acknowledge receipt of this RFP by sending an email to rami.afadar@undp.org & syria.procurement@undp.org, indicating whether you intend to submit a Proposal or otherwise. You may also utilize the "Accept Invitation" function in

eTendering system, where applicable. This will enable you to receive amendments or updates to the RFP. Should you require further clarifications, kindly communicate with the contact person/s identified in the attached Bid Data Sheet as the focal point for queries on this RFP.

UNDP looks forward to receiving your Proposal and thank you in advance for your interest in UNDP procurement opportunities.

Tender Details

Document type : Prequalification

Bidding type : Not Specified

Project location : United States

Tender notice No : ICFA EBD Portfolio

Description : Request for pre-qualification: Framework agreement for three project portfolio technical support consultants for the undp-gef ecosystems and biodiversity portfolio
Description of Responsibilities: The consultants will provide support to all the regions based on demand in any particular country over the contract period, supporting the Head of the ecosystem and biodiversity (EBD) team and the team of Regional Technical Advisors(RTAs) located in the UNDP-GEF RCUs in conceptualizing and writing a range of documents relating to project development, implementation support, mid-term review, and terminal evaluation. This will include liaison with UNDP Country Offices, Regional Technical Advisors, Government stakeholders (where appropriate and under guidance of the RTA), project teams, and other relevant

consultants. For selected countries, the consultants will provide demand-based technical support to pipeline and project development including: Support the development and writing of GEF Project Identification Forms (PIFs); Support the formulation and review of Initiation Plans and Terms of Reference for Project Preparation Grants (PPGs); Support development of Project Documents, GEF CEO endorsement requests and other required items for full project submission packages (where the consultant had no prior involvement with the PPG Initiation Plan); Support the writing/reviewing of TORs for Mid Term Reviews and Terminal Evaluations; Writing and editing of Mid Term Reviews and Terminal Evaluations (where the consultant had no prior involvement with the project); Undertake PIF/Project development travel as needed; Technical support to Country Offices (COs) to finalize annual Project Implementation Reviews (PIR) including providing inputs to the commentary for each PIR, liaising with COs and project teams as required, and editing the PIR for yearly submission in October, improving the quality of English language, as required; Support the PTA/RTAs in the development of strategic UNDP policy position papers and internal briefing notes, as needed; In collaboration with PTA/RTAs, support programme and project identification and development, including on integrated approaches and multifocal area projects; Support COs through the provision of tools and guidance to assist with inception, contracting and start-up of programmes/projects including establishment of indicators, benchmarks, and work plans; Technical Support to COs and Regional Team to prepare reports and communications pieces effectively showcasing socio-economic development benefits, as well as, environment results; Technical support to UNDP-GEF EBD team on knowledge management including evaluating, capturing, codifying, synthesizing lessons and stimulating the uptake of best practices and knowledge, including the development of knowledge materials; Support to COs in responding to queries on programme/project progress, impacts and lessons; A

Tender Details

Document type : Tender Notice

Bidding type : International Competitive Bidding

Project location : Vietnam

Tender notice No : 55653

Description : Tenders are invited for International consultant for an integrated dengue early warning system driven by climate change earth observations in viet nam (a-190504) The partnership project An integrated dengue early warning

system driven by Earth Observations in Viet Nam (See Annex 1 for Key Project Description) is funded by the United Kingdom Space Agency for a consortium led by HR Wallingford and participated by the London School of Hygiene and Tropical Medicine, the UK Meteorology Office, Oxford Policy Management Limited, the United Nations Development Program (UNDP) and the World Health Organisation (WHO). The project aims to develop an innovative tool to possibly provide public health authorities and communities in Viet Nam advance warning of likely dengue outbreaks. The activities will spread over 9 inter-connected work packages. Key project aims Develop an early warning system to improve dengue epidemic prevention and increase disease control capacity; Create better understanding of the relationships between environmental stressors, the hydrological-climate system and dengue incidence; and Benefit local authorities planning by providing scenarios of the main stressors and their impacts on dengue incidence. This project will test a tool providing advance warning of several months of likely dengue outbreaks the dengue forecasting tool. The tool will primarily be developed in work package 2 and 3, but the design, testing and calibration will be done through several inter-connected work packages. This tool will be tested in four provinces (in the Southern, Centre, Highlands, and Northern Regions) in Viet Nam. This project will greatly assist public health authorities to mobilise resources to those most in need. The same methods could also be used to forecast outbreaks of Zika and chikungunya which have recently begun to be reported in Viet Nam. Under work package 2 and 3, Earth Observation (EO) datasets will be combined with health and water availability information to produce a new integrated dengue forecasting model. The project will also provide projections of dengue fever under a range of climate change scenarios. The tool produced will be used to understand changing health risks posed by dengue for different temporal and spatial scales under future climate change scenarios. The advance warnings of sufficient accuracy would assist communities better prepare themselves for dengue outbreaks and help authorities make better use of scarce resources and help improve disease surveillance for dengue. Currently there is no system in Viet Nam to forecast the probability of future dengue outbreaks.
