The debt management strategy assumes maintaining the ATM close to 5 years, taking into account the possibility of temporary deviations resulting from market and budget conditions related to the effects of the COVID-19 epidemic. The ATM of the domestic debt amounted to 4.26 years, i.e. it rose by 0.04 year m/m (mainly as a result of sale auction, switching auctions, debt aging and T-bill redemption) and rose by 0.03 years compared to the end of 2020. The ATM level of the domestic debt, according to the debt management strategy, may temporarily deviate from the target of 4.5 years as a result of market and budgetary conditions related to the effects of the COVID-19 epidemic. In March 2021 the ATM of the foreign debt rose by 0.08 year m/m (mainly as a result of a loan from the European Union under the SURE facility, redemption of the EUR bonds and debt aging) and rose by 0.70 year compared to the end of 2020 remaining at a safe level of 6.42 years.

ATR of ST debt

The ATR level in March was a result of the increase in the ATR of the domestic debt, which amounted to 3.19 years (by 0.02 year m/m) and the increase in the ATR of the foreign debt, which amounted to 5.50 years (by 0.07 year m/m). The levels of the ATR resulted from changes in the ATM and the share of floating rate instruments. The level of duration was a result of the increase of the duration of the domestic debt (by 0,01 year m/m) to 3.08 years and increase of the duration of the foreign debt which amounted to 5.29 years (by 0.04 year m/m). The changes in the duration resulted mainly from changes in interest rates level and the ATR. The levels of the ATR, as well as the duration, indicated that the interest rate risk of the ST debt remained stable.

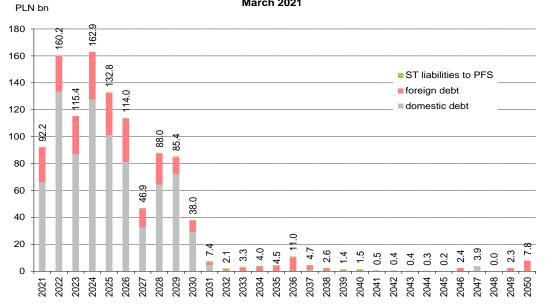

ATM and duration* of domestic ST debt by group of investors

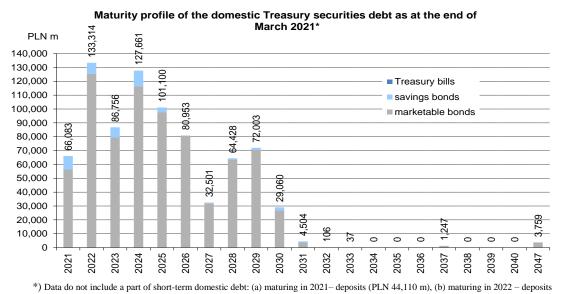

At the end of March 2021 the ATM and the duration of the portfolio of the domestic TS held by foreign investors amounted to 4.76 vears (-0.03 years m/m) and 4.70 years (-0.03 years m/m) respectively.
