Ethyl Alcohol¹

Code	Product description	Supplementary unit	Conversion factor for unit mass
2207 10 00	Undenatured ethyl alcohol of an alcoholic strength by	litres	0.83000

¹ The density of ethyl alcohol (100%) at 20°C is 0.789 kg/l (or 0.794 kg/l (at 15°C). The difference in ethanol content among products under different codes entails differences in the conversion factors.

	volume of 80 % vol or higher		
2207 20 00	Denatured ethyl alcohol (any strength)	litres	0.90000
2208 90 91	Undenatured ethyl alcohol of an alcoholic strength by volume of less than 80 % vol, in containers holding 2 litres or less	1 alc. 100%	1.86398
2208 90 99	Undenatured ethyl alcohol of an alcoholic strength by volume of less than 80 % vol, in containers holding more than 2 litres	1 alc. 100%	1.12863
