In May 2021 the ATM of the foreign debt rose by 0.12 year m/m (mainly as a result of a loan from the European Union under the SURE facility and debt aging) and rose by 0.91 year compared to the end of 2020 remaining at a safe level of 6.63 years.

ATR of ST debt

In May 2021 the average time to re-fixing (ATR) of the ST debt amounted to 3.91 years (i.e. rose by 0.10 year m/m and rose by 0.34 year as compared to the end of 2020). The ATR level in May was a result of the increase in the ATR of the domestic debt, which amounted to 3.26 years (rose by0.07 year m/m) and the increase in the ATR of the foreign debt, which amounted to 5.74 years (by 0.18 year m/m). The levels of the ATR resulted from changes in the ATM and the share of floating rate instruments. The ATR of the domestic debt remained within range of 2.8-3.6 years assumed in the public debt management strategy.

Duration* of ST debt

In May 2021 the duration of the ST debt amounted to 3.77 years (i.e. rose by 0.07 year m/m and rose by 0.21 year as compared to the end of 2020). The level of duration was a result of the rose of the duration of the domestic debt which amounted to 3.14 years (by 0.05 year m/m) and increase of the duration of the foreign debt which amounted to 5.44 years (by 0.12 year m/m). The changes in the duration resulted mainly from changes in interest rates level and the ATR. The levels of the ATR, as well as the duration, indicated that the interest rate risk of the ST debt remained stable.

ATM and duration* of domestic ST debt by group of investors

At the end of May 2021 the ATM and the duration of the portfolio of the domestic TS held by foreign investors amounted to 4.71 years (-0.09 years m/m) and 4.67 years (-0.08 years m/m) respectively. The ATM and the duration of the domestic non-banking sector TS portfolio amounted to 4.36 years (no change m/m) and 3.03 years (+0.09 years m/m), respectively. The ATM and the duration of the TS portfolio held by the domestic banking sector amounted to 4.17 years (+0.05 years m/m) and 2.98 years (+0.14 years m/m), respectively.
